

Model AM Series Antenna Mounting Adaptor

The Model AM Series consists of antenna mounting adaptors that will allow polarization change during horizontal and vertical testing without removing the antenna from its tripod. The AM Series comes with a 20" non-metallic mast and is available for the earlier version antenna models listed below.

All tools necessary for installation are included with each mounting adaptor.

Model	Antenna
AM1000	AT1000, AT1000A
AM1001	AT1080, AT1080A
AM6000	AT 5080, AT6080
AM8000	AT4002A, AT4510, ATH1G4, ATH800M5G, ATH800M5GA

NOTE: The AM series adaptor comes standard on the ATL80M1G and ATR80M6G models.
