

**Model CF00400
Calibration Fixture
10kHz–400MHz**

The Model CF00400 is a calibration fixture designed to work in conjunction with a current clamp for the purpose of level setting prior to conducted immunity testing as specified in the MIL-STD-461 CS114 and DO160 standards.

SPECIFICATIONS

Frequency Range	10kHz–400MHz
Impedance	50 ohms
Connectors	Coaxial Type N female
Weight (maximum)	3 kg (6 lbs)
Size (maximum W x H x D)	See below
