

**Model CF01000  
Calibration Fixture  
100kHz–1000MHz**

The Model CF01000 is a calibration fixture designed to work in conjunction with a current clamp for the purpose of level setting prior to conducted immunity testing as specified in the standards.

**SPECIFICATIONS**

Frequency Range.....	100kHz–1000MHz
Impedance.....	50 ohms
Connectors .....	Coaxial Type N female
Weight (maximum) .....	3 kg (6 lbs)
Size (maximum W x H x D).....	See below
