

**Model CR00100 Series
Calibration Resistor
150 to 50 Ohm Adapter**

The CR00100 Series are 150 to 50 ohm adapters used in RF Conducted Immunity testing. The resistor, when connected in common mode to the coupling device, presents the required impedance for calibration purposes.

SPECIFICATIONS

	CR00100BC	CR00100CD
Electrical:		
Nominal Impedance	100 ohm	100 ohm
Frequency Range	10 kHz-230 MHz	10 kHz-230 MHz
Power Rating	≥ 2.5 watts	≥ 2.5 watts
Insertion Loss	9.5 ± 0.5 dB	9.5 ± 0.5 dB
Mechanical:		
Temperature Range	-55°C - 125°C	-55°C - 125°C
Connectors	Type N	Type N, Banana Plug
